

# Consensus Change Readiness Checklist

Fulks, Consensus Change Standards (4th ed. 2026), Sec. 5.1 | CC BY 4.0

Proposal:  Evaluator:  Date:

Mark each criterion Met or Not met. N/A is permitted ONLY for criteria 11-12 (structural: no such mechanism in the deployment) and 19-20 (temporal: proposal predates any published readiness standard); N/A criteria drop from both numerator and denominator (Sec. 5.2). Emergency hard forks (Sec. 3.7, subtype 4b) are evaluated under the 4b standards, not scored here.

|                                                                                               | Met                      | Not                      | N/A                      |
|-----------------------------------------------------------------------------------------------|--------------------------|--------------------------|--------------------------|
| <b>A. Proposal Quality</b>                                                                    |                          |                          |                          |
| 1 Clear, empirically supported problem statement.                                             | <input type="checkbox"/> | <input type="checkbox"/> | -                        |
| 2 Complete technical specification; independently implementable.                              | <input type="checkbox"/> | <input type="checkbox"/> | -                        |
| 3 Backward-compatibility analysis covering all affected tx types, scripts, use cases.         | <input type="checkbox"/> | <input type="checkbox"/> | -                        |
| 4 Fully specified activation mechanism (threshold, timeline, failure mode).                   | <input type="checkbox"/> | <input type="checkbox"/> | -                        |
| 5 Rollback procedure; self-executing sunset if labeled "temporary."                           | <input type="checkbox"/> | <input type="checkbox"/> | -                        |
| <b>B. Code Quality</b>                                                                        |                          |                          |                          |
| 6 $\geq 3$ expert reviewers from distinct organizations; prior collaboration disclosed.       | <input type="checkbox"/> | <input type="checkbox"/> | -                        |
| 7 Comprehensive unit, integration, and regression tests.                                      | <input type="checkbox"/> | <input type="checkbox"/> | -                        |
| 8 Testnet deployment $\geq 3$ months; deactivation tested if sunset included.                 | <input type="checkbox"/> | <input type="checkbox"/> | -                        |
| 9 Fuzzing and adversarial testing performed.                                                  | <input type="checkbox"/> | <input type="checkbox"/> | -                        |
| 10 Named human reviewer attests comprehension of consensus-critical code.                     | <input type="checkbox"/> | <input type="checkbox"/> | -                        |
| <b>C. Activation Safety</b>                                                                   |                          |                          |                          |
| 11 Miner-signaling threshold (where used) $\geq 90\%$ .                                       | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 12 UASF (if used) has completed full review and broad economic-node support.                  | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 13 Chain-split risk assessment completed and published.                                       | <input type="checkbox"/> | <input type="checkbox"/> | -                        |
| 14 Replay protection, or documented rationale where split impossible absent defection.        | <input type="checkbox"/> | <input type="checkbox"/> | -                        |
| 15 Signaling only after the review floor elapses; enforcement $\geq 6$ mo after final client. | <input type="checkbox"/> | <input type="checkbox"/> | -                        |
| <b>D. Community Process</b>                                                                   |                          |                          |                          |
| 16 Minimum review period for risk category (12 / 24 months; Sec. 3.7 hard-fork floors).       | <input type="checkbox"/> | <input type="checkbox"/> | -                        |
| 17 Public discussion across diverse stakeholders.                                             | <input type="checkbox"/> | <input type="checkbox"/> | -                        |
| 18 Major exchanges and infrastructure providers consulted.                                    | <input type="checkbox"/> | <input type="checkbox"/> | -                        |
| 19 Chain-split contingency plan published by proposal author.                                 | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |
| 20 Structured evaluation against a published readiness standard, published or answered.       | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

**Total:** criteria met:  of applicable:

Classification (Sec. 5.2): 100% = Green; 75-99% = Yellow; 50-74% = Orange; < 50% = Red.

Publish the scoring with its evidentiary basis (Sec. 5.3); cite the edition evaluated against (App. B.4).
