

Consensus Change Readiness Checklist

Fulks, Consensus Change Standards (5th ed. 2026), Sec. 5.1 | CC BY 4.0

Proposal:

Evaluator:

Date:

Mark each criterion Met or Not met. N/A is permitted ONLY for criteria 11-12 (structural: no such mechanism in the deployment) and 19-20 (temporal: proposal predates any published readiness standard); N/A criteria drop from both numerator and denominator (Sec. 5.2). Emergency hard forks (Sec. 3.7, subtype 4b) are evaluated under the 4b standards, not scored here.

	Met	Not	N/A
A. Proposal Quality			
1 Clear, empirically supported problem statement.	☐	☐	-
2 Complete technical specification; independently implementable.	☐	☐	-
3 Backward-compatibility analysis covering all affected tx types, scripts, use cases.	☐	☐	-
4 Fully specified activation mechanism (threshold, timeline, failure mode).	☐	☐	-
5 Rollback procedure; self-executing sunset if labeled "temporary."	☐	☐	-
B. Code Quality			
6 >= 3 expert reviewers from distinct organizations; prior collaboration disclosed.	☐	☐	-
7 Comprehensive unit, integration, and regression tests.	☐	☐	-
8 Signet/testnet deployment >= 3 months; deactivation tested if sunset included.	☐	☐	-
9 Fuzzing and adversarial testing performed.	☐	☐	-
10 Named human reviewer attests comprehension of consensus-critical code.	☐	☐	-
C. Activation Safety			
11 Miner-signaling threshold (where used) >= 90%.	☐	☐	☐
12 UASF (if used) has completed full review and broad economic-node support.	☐	☐	☐
13 Chain-split risk assessment completed and published.	☐	☐	-
14 Replay protection, or documented rationale where soft fork cannot split absent defection.	☐	☐	-
15 Signaling only after the review floor elapses; enforcement >= 6 mo after final client.	☐	☐	-
D. Community Process			
16 Minimum review period for risk category (12 / 24 months; Sec. 3.7 hard-fork floors).	☐	☐	-
17 Public discussion across diverse stakeholders.	☐	☐	-
18 Major exchanges and infrastructure providers consulted.	☐	☐	-
19 Chain-split contingency plan published by proposal author.	☐	☐	☐
20 Structured evaluation against a published readiness standard, published or answered by proponents.	☐	☐	☐

Total: criteria met:

of applicable:

Classification (Sec. 5.2): 100% = Green; 75-99% = Yellow; 50-74% = Orange; < 50% = Red.
Publish the scoring with its evidentiary basis (Sec. 5.3); cite the edition evaluated against (App. B.4).
